

**ABSTRACT OF THE DISCLOSURE**

A method for deriving enhanced image processing parameters for a source digital image, comprising the steps of: a) providing a source digital image; b) generating at least three rendered digital images from the source digital image with at least one image processing parameter associated with each rendered digital image; c) displaying the rendered digital images on a display; d) selecting two or more of the rendered digital images; and e) using the image processing parameters associated with the rendered digital images to generate enhanced image processing parameters.
